

Locked Out

Faculty: Environment

Dear diary. I hate geese. I always have. I pretended to like them because people look at you funny if you say you don't like an animal, but I must say that I'm not surprised my fate is now in the hands (or feet?) of these noisy, irritable creatures. Only a goose would do this.

Re: locked out of account??!?

[IST Services](#)

From: pbruce@uwaterloo.ca

Dear Dr. G. Nozi,

I'm sorry that you are having trouble accessing your account. We have reset your password for you.

Please log in by entering your UW email address followed by your secret ID key. You may then enter your password, which has been set to your full first name.

Sincerely,

Patrick Bruce, IST

UNIVERSITY OF
WATERLOO

Solution: The email from IST services provides instructions on how to begin. Based on the form of the email address for Patrick Bruce, we can infer that the email address for G. Nozi is gnozi@uwaterloo.ca. Enter “GNOZI“ one character at a time by turning Part #AA until the character aligns with the Email Address field. As each character is entered, the triangles on the interior of each gear will point to a letter in the following gear, spelling the phrase SWAP BB TO DD ID KEY RTPUK.

From here, swap Part #BB with Part #DD. To ensure the gears are positioned correctly in their new locations, align the gears according to the colouring of the triangles inside.

Similar to when entering the email address, turn the characters of Part #AA to align each of the characters RTPUK in the ID Key field. The triangles of each gear will again point to characters in the following gear, spelling the phrase BLONDE BEAR BURGLARESS, which is a hint to the password (and G. Nozi’s first name): GOLDILOCKS.
