

# Squares

## Goose 2:

We start by cutting the 20 squares out and arranging / overlapping them to form the picture below of several overlapping squares with the words **DEPEND** and **ENDED**. We then overlap these two words to get the final answer, which is **DEPENDED**.

This puzzle was very enjoyable to make, and went through many iterations. First the words were side by side, then the letters were in a cursive font, then they were grey, but ultimately we decided that we wanted to make this puzzle challenging, so tried to make the letters blend in to the squares as much as possible.
